

INTERLIGHT ORION LINEAR LED

Algemene omschrijving

Dit Orion armatuur heeft 30% uplight en 70% downlight. Dit geeft een mooi ruimtelijk effect. Dankzij de Orion optiek is het armatuur niet verblindend. De armaturen zijn individueel te gebruiken, bijvoorbeeld als werkplekverlichting boven een bureau, én koppelbaar. Er zijn L, T en X alsmede rechte koppelstukken verkrijgbaar (in zwart en wit). De bedrading om de armaturen te koppelen is voorbereid, dus plug&play!

Om één individueel armatuur te pendelen is 1x een pendelkit met voedingskabel nodig (IL-LOPKIT1B of IL-LOPKIT1W) en 1x IL-LOPKIT2. Wanneer je meerdere armaturen aan elkaar koppelt heb je ook 1x pendelset IL-LOPKIT1 nodig en meerdere pendelkabels IL-LOPKIT2. Vergeet niet de koppelstukken & eindkappen mee te bestellen!

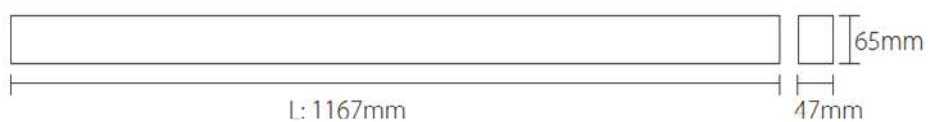

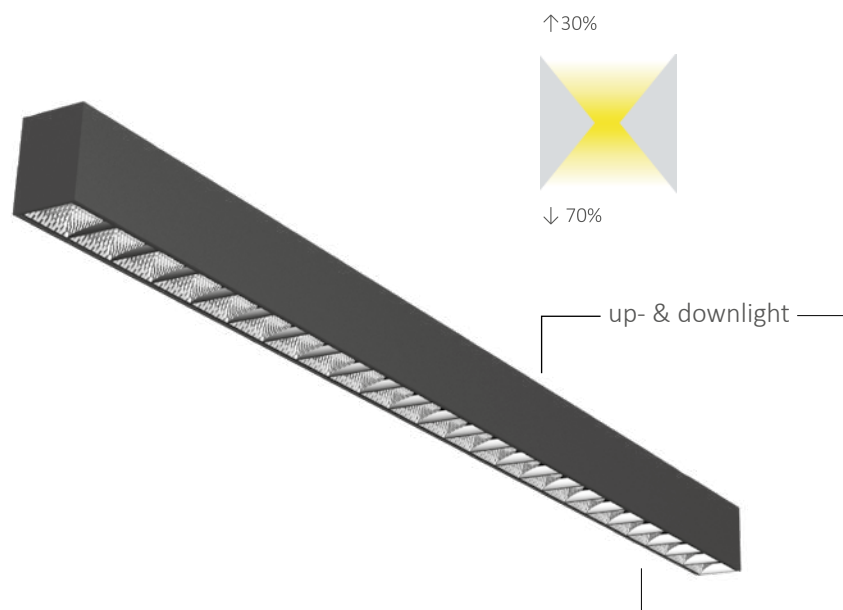

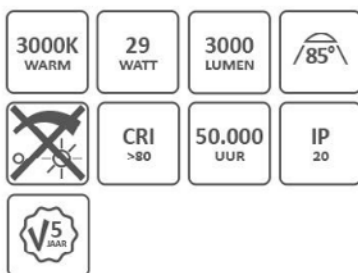

De driver van de Orion Linear is ENEC gecertificeerd.
