7E - MASTER-SLAVE (Signal is sent to every luminaire connected in the line)

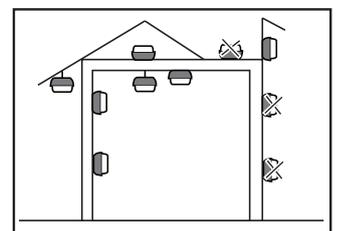

7F - ZONE 1: MASTER-SLAVE / ZONE 2: MASTER-SLAVE (Signal is sent to every luminaire connected in the same line and zone)

Warning ⚠

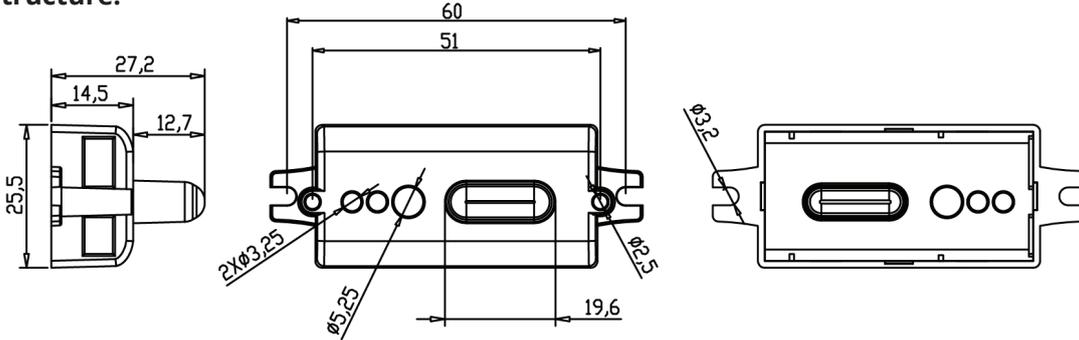

- Only qualified electrician is allowed to do installation, maintenance and inspection for safety concern. It is dangerous for non-professional operators.
- Power should be cut off before installation, maintenance or inspection.
- Please install and use the product strictly according to the instruction.
- Do not disassemble or remold the product at will to avoid accident of electric shock or light falling.
- Working out of temperature range of -25 ~ +40 will shorten the lifetime of the product.

Item Description	EAN
Pragmalux Hermes component step dim bewegingssensor	8721432002074
Pragmalux Hermes accessoire afstandsbediening voor step-dim sensor	8721432000261

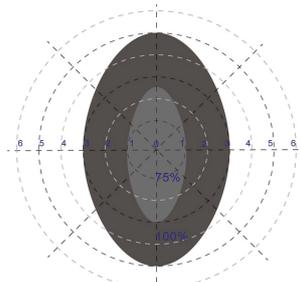

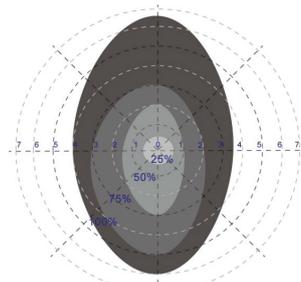

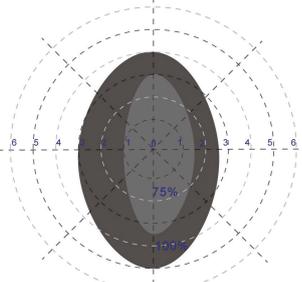

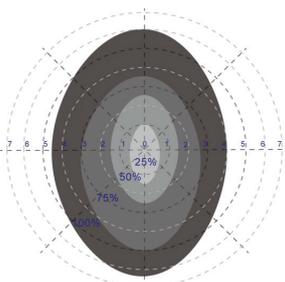

Structure:

Ceiling mounting:

Ceiling mounted height: 3m
Sensitivity: 100%/75%/50%/25%

Ceiling mounted height: 6m
Sensitivity: 100%/75%

Normal moving (Speed: 1m/s)

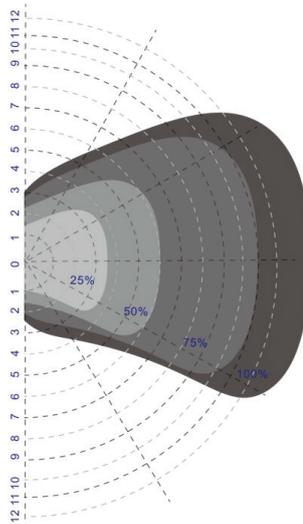

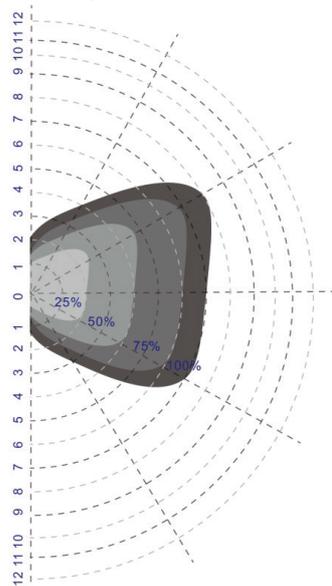

Normal moving (Speed: 1m/s)

Slow moving (Speed: 0.3m/s)

Slow moving (Speed: 0.3m/s)

Wall mounting:

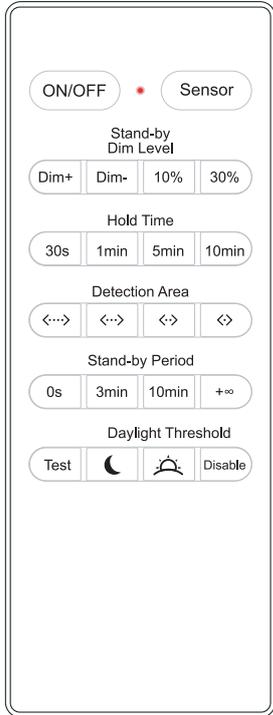

Wall mounted height: 2m
Sensitivity: 100%/75%/50%/25%

Slow moving (Speed: 0.3m/s)

*When installed at 6m height, sensor with 50%/25% detection area is unable to detect motion signal.

Normal moving (Speed: 1m/s)

Button	Function	Description
ON/OFF	Normal ON/OFF	Press the ON/OFF button, sensing function is canceled and the light will remain ON/OFF. Sensor has power-off memory function, that is: Power on again under the "ON" mode of the load lamp, the load lamp enters "ON" mode. Power on again under the "OFF" mode of the load lamp, the load lamp enter the normally "OFF" mode after on for 2s.
Sensor	Recover sensing	Press this button to recover sensing function.
Dim+	Increasing Brightness	Press this button continuously, the brightness will increase. When adjusting the brightness at full brightness, ON/OFF mode is still available.
Dim-	Reducing Brightness	Press this button continuously, the brightness will reduce. When adjusting the brightness at full brightness, ON/OFF mode is still available.
Stand-by Dim Level	Low Brightness	10%, 30%
Hold Time	100% Brightness	30s, 1min, 5min, 10min
Detection Area	Detection Area	100% <---> , 75% <--> , 50% <-> , 25% <>
Stand-by Period	Stand-by Time	0s, 3min, 10min, +∞
Test	TEST Button	Press this button, the light will turn off after 2 seconds. Restore to last sensing setting after power off.
Daylight Threshold	Threshold	15lux ☾ , 50lux ☀ , Disable

Warning ⚠

- Only qualified electrician is allowed to do installation, maintenance and inspection for safety concern. It is dangerous for non-professional operators.
- Power should be cut off before installation, maintenance or inspection.
- Please install and use the product strictly according to the instruction.
- Do not disassemble or remold the product at will to avoid accident of electric shock or light falling.
- Working out of temperature range of -20 ~ +40 will shorten the lifetime of the product.

Item Description	EAN
LED Emergency pack for waterproof	8720094608198

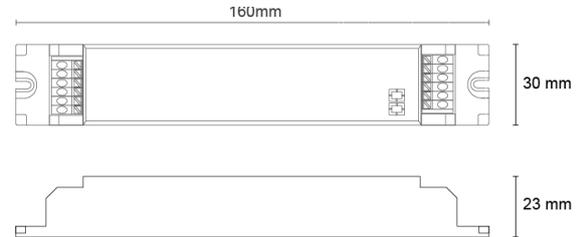

Technical data:

- Input rated voltage: 220-240V AC 50-60Hz
- AC input current 10-60mA
- AC Input power rated 4 W max
- Power factor: >0.6
- Charge time ≥16 hours
- Charge mode: trickle re-charging on battery.
- Output emergency power 4 watt constant power output
- Lumen: 560lm
- Output voltage DC50-200V
- Battery capacity (LiFePo4):3000mAh
- Battery Charging Current 0-400mA
- 3 hours rated duration
- Charging indicator light
 - Green light on--Battery is charging
 - Green light on--Battery is fully charged
 - Indicator off--Malfunction
- Max. casing temperature tc 70°C
- Reinforced insulation between the supply and the battery circuit.
- This unit can recharge the battery normally after reconnecting of battery

Standards:

- IEC 61347-1
- IEC 61347-2-7
- EN 55015
- IEC 60598-2-22

Dimensions:

Wiring:

LED indicator:

- Battery is charging
- Battery is fully charged
- Indicator off - Malfunction

Battery Declaration:

Battery lifetime is 4 years. After 4 years the battery must be replaced.

Manual-test function:

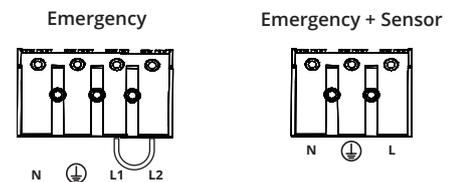

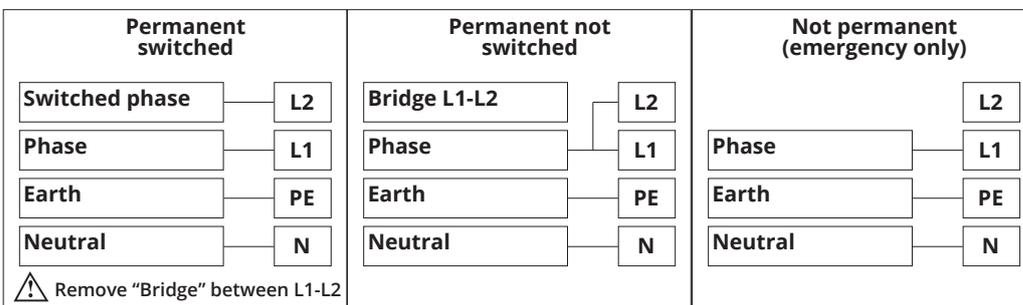

Before installation or maintenance, ensure that the mains supply to the luminaire is switched off and the circuit supply fuses are removed or circuit breaker switched off.

Installation must be carried out by a competent person, in accordance with the current edition of the IEE wiring Regulations, relevant Building Regulations and the national or local wiring regulations.

No automatic test function.

Check that the total load on the circuit, including this product, does not exceed the rating of the circuit cable, fuse or circuit breaker.

The test button is an open switch, if it's pressed it connects, after it's released, it cuts off automatically. When doing the daily maintenance, if the button is pressed, the emergency driver goes into emergency mode, if the button is released, the emergency driver will go back to normal mode.

⚠ Standard Included "Bridge" between L1-L2

Only for Permanent non switched installations

⚠ **ATTENTION!** Standard included the "Bridge" between L1-L2 for Permanent non switched connection. Remove the "Bridge" between L1-L2 for Permanent switched connection.

Warning

- Only qualified electrician is allowed to do installation, maintenance and inspection for safety concern. It is dangerous for non-professional operators.
- Power should be cut off before installation, maintenance or inspection.
- Please install and use the product strictly according to the instruction.
- Do not disassemble or remold the product at will to avoid accident of electric shock or light falling.
- Working out of temperature range of -20 ~ +40 will shorten the lifetime of the product.
